A screenshot of a web browser window showing a security warning. The address bar shows 'campusvirtual.unitec.edu.co'. A large red warning icon with an exclamation mark is displayed. The main text reads 'La conexión no es privada' (The connection is not private). It explains that attackers might be intercepting information if the connection is not private. There are buttons for 'Deshabilitar configuración avanzada' (Disable advanced settings) and 'Volver para editar la conexión' (Return to edit connection). Below this, it states that the server did not provide proof that the website is legitimate, due to an expired certificate. It suggests checking the date on the computer or changing the system clock. At the bottom, there is a link to 'Acceder a campusvirtual.unitec.edu.co como no seguro' (Access campusvirtual.unitec.edu.co as not secure).
